

MRMI CONTROL center

WELCOME TO THE MRMI CONTROL center

The Meta Music Operations & Rights Metadata Integrity (MRMI) Control Center is the central intelligence hub for managing the ingestion, compliance, and catalog health of Meta's Creative Audio ecosystem.

Monitoring a dynamic catalog of over 35,000 assets and 45,000 ingestion events, this suite empowers cross-functional teams to transition from reactive troubleshooting to proactive governance.

By tracking operational SLAs, isolating supplier delivery bottlenecks, and actively triaging thousands of DDEX metadata anomalies by technical severity (P0/P1), the MRMI Control Center ensures that all music assets are accurately processed, legally compliant, and perfectly optimized for immersive, next-generation Metaverse experiences.

METVERSE MUSIC
OPERATIONS

POWERING THE FUTURE OF IMMERSIVE MUSIC

GLOBAL INGESTION VOLUME

45,000

Tracks total system throughput to ensure Meta's scaling demands are met across the immersive content ecosystem.

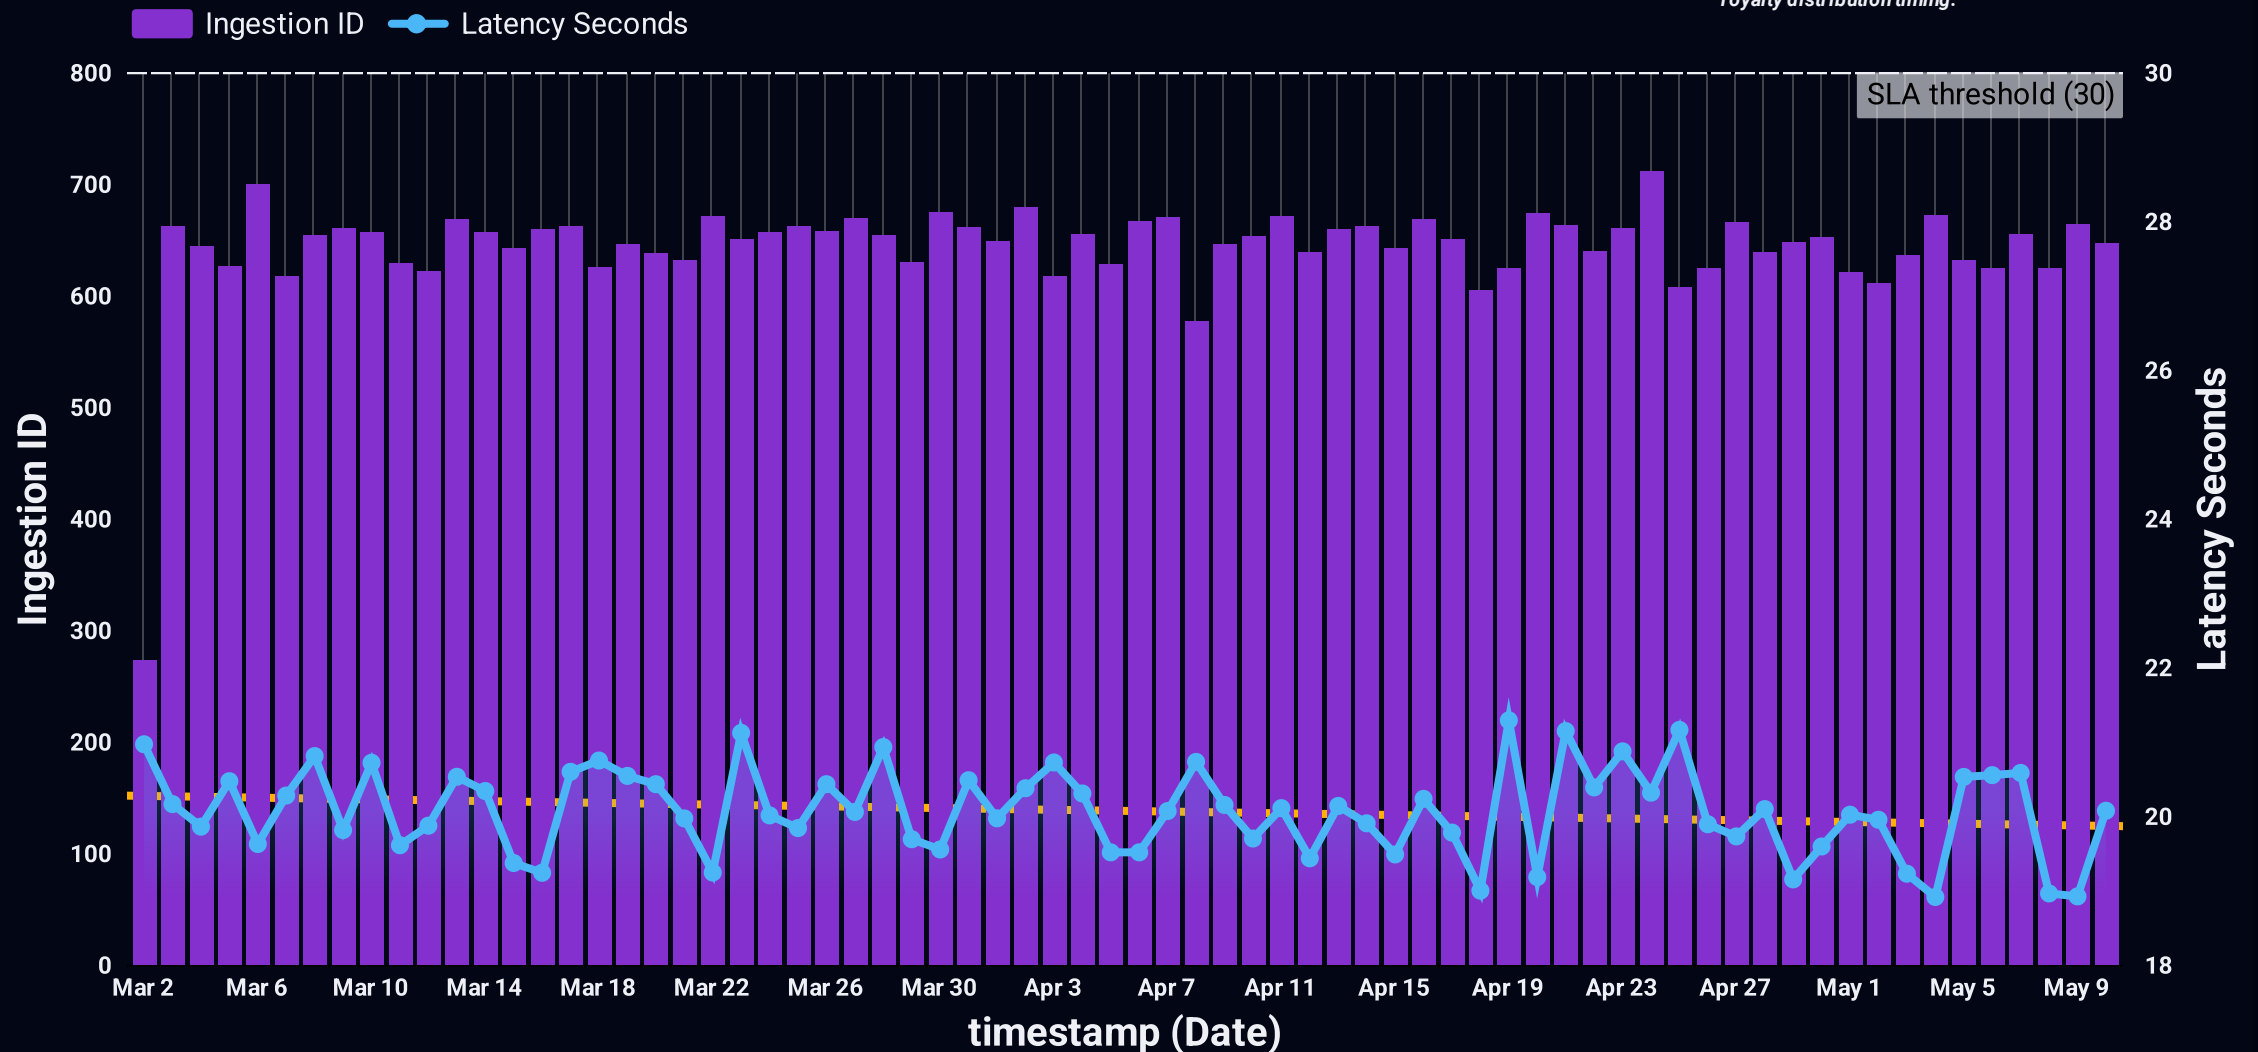

GLOBAL SUCCESS RATE

89.97%

Measures real-time ingestion health to identify system-wide bottlenecks in the automated DDEX metadata pipeline.

INGESTION PERFORMANCE TRENDS

Correlates daily volume against processing speed to detect when high-load events threaten SLA compliance and royalty distribution timing.

Partner Performance & SLA Management

METVERSE MUSIC
OPERATIONS

Partner Health: Intended For "Partner Managers" To Drive remediation with the 13 Breaching Suppliers.

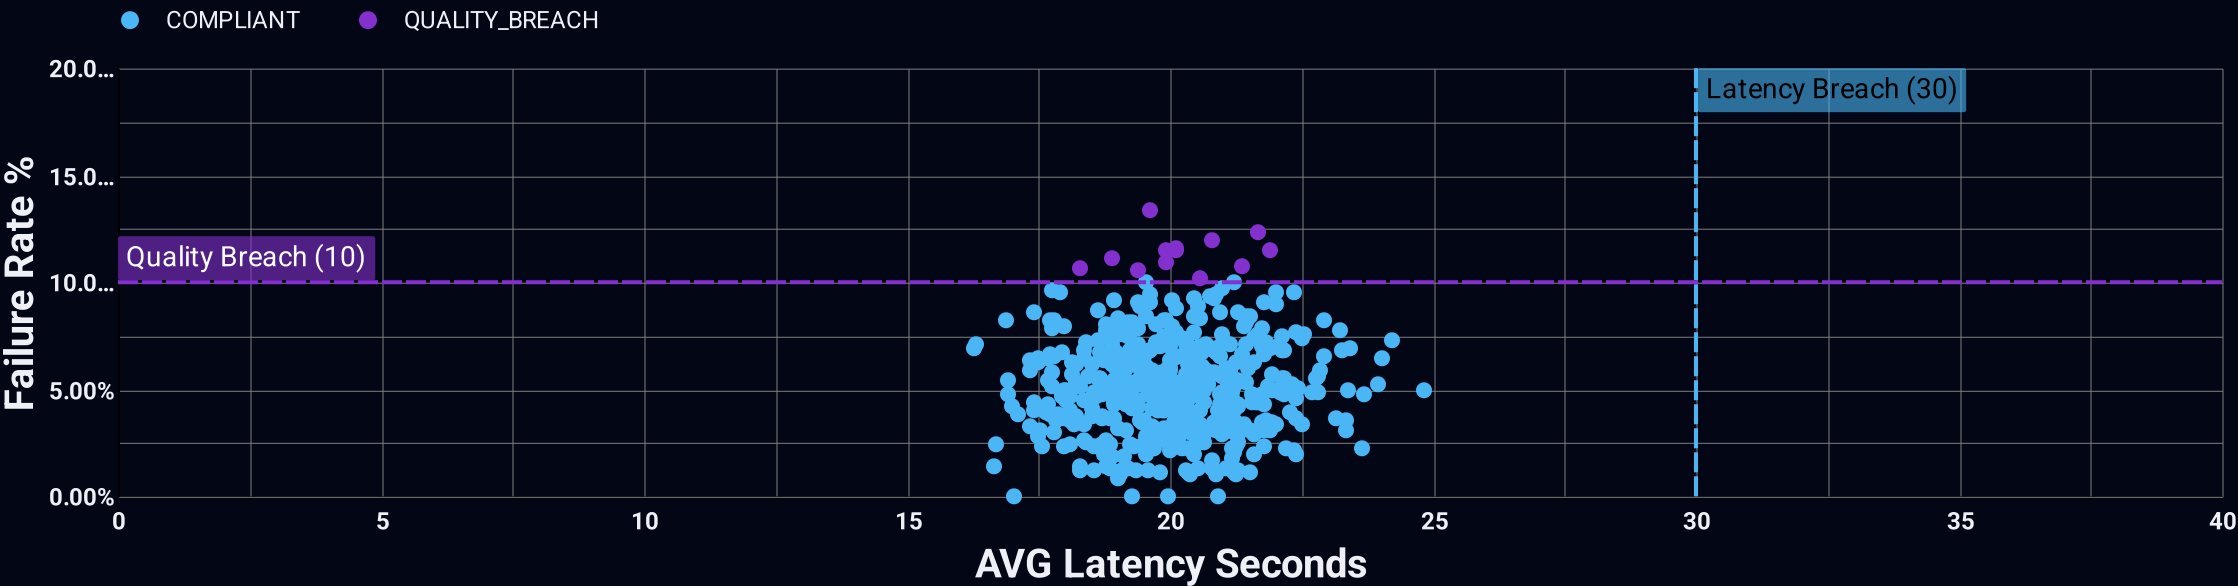

Mar 2, 2026 - May 10, 2026

region

THE SUPPLIER Breach Matrix

Visualizes high-risk partners by distinguishing between technical latency and metadata quality failures to prioritize remediation efforts.

HIGH-PRIORITY Remediation List

Provides a prioritized target list of suppliers requiring direct technical engagement to rectify chronic metadata submission errors.

	Supplier Name	Overall SLA Status	Region	Total Submissions	Failure Rate %
1.	Label_Group_312	QUALITY_BREACH	US	60	13.33%
2.	Label_Group_463	QUALITY_BREACH	APAC	81	12.35%
3.	Label_Group_130	QUALITY_BREACH	EMEA	67	11.94%
4.	Label_Group_321	QUALITY_BREACH	APAC	86	11.63%
5.	Label_Group_136	QUALITY_BREACH	APAC	104	11.54%
6.	Label_Group_334	QUALITY_BREACH	LATAM	61	11.48%
7.	Label_Group_203	QUALITY_BREACH	EMEA	61	11.48%
8.	Label_Group_182	QUALITY_BREACH	LATAM	81	11.11%

1 - 100 / 500

Metadata Integrity: Intended For "Quality Engineers" To Investigate The 6,950 Technical Discrepancies.

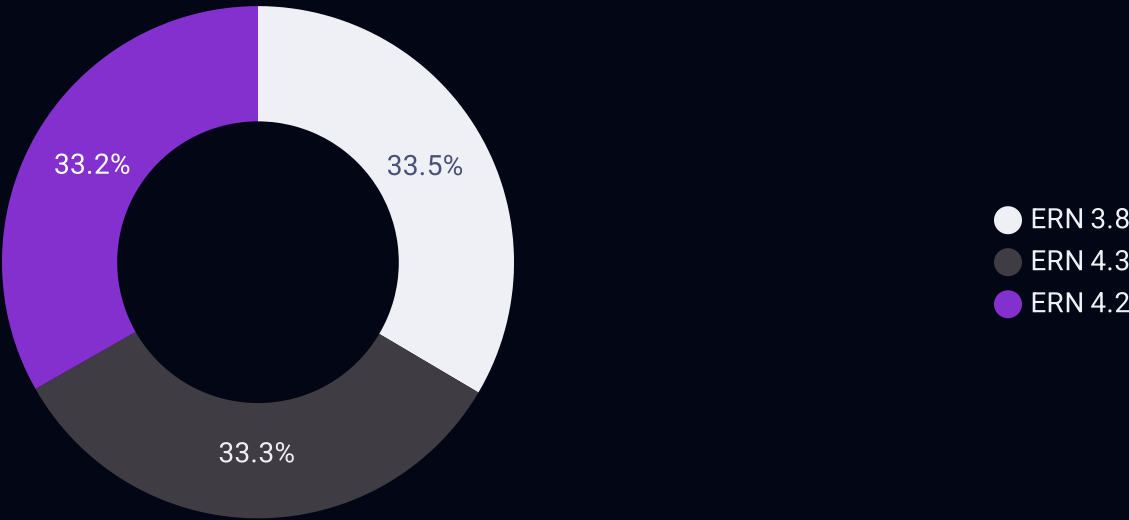

Mar 2, 2026 - May 10, 2026

supplier_name

region

DDEX Version Compliance Audit

Audits the catalog's technical standards to identify assets requiring legacy version upgrades for Metaverse compatibility.

Spatial Audio Discrepancy Detail

Prioritizes 6,950 inconsistent spatial audio assets by technical severity, providing an actionable triage roadmap for Quality Engineers to remediate high-risk (P0/P1) metadata mismatches and ensure compliant immersive audio playback across the Metaverse.

	Title	Issue ID	ISRC	DDEX Version ^	Technical Severity	Anomalies
